

# UTILITRA

YOUR  
FORMULA  
FOR BETTER BUSINESS

## GIS / MAPPING

Utilitra has years of experience providing a variety of GIS and surveying services, consistently staying at the forefront of GIS technology by keeping versed in the latest advancements and innovations in the field. Utilizing receivers with the most up-to-date, localized coordinate systems, we deliver precise, survey-grade GIS data, consistently exceeding horizontal and vertical accuracy standards from our largest clients.

Our team ensures that every GIS dataset we produce is enriched with vital attribute data tailored to the specific needs of our clients, including detailed information about each spatial feature, enabling more informed decision-making, efficient resource management, and enhanced spatial analysis.

### Past Deliverables:

*ESRI File Geodatabases*  
*ArcGIS Feature Services*  
*GeoPackages*

### Software Experience:

*ArcGIS Pro*                      *QField*  
*ArcGIS Online*                *Trimble Connect*  
*ArcGIS Field Maps*         *Open Drone Map*  
*QGIS*

### Project Experience:

*Construction As-Builts*  
*Underground electric networks*  
*Gas distribution systems*  
*Underground utility locating and  
GPS data collection*

*Maintenance and inspection schedules*  
*Drone imagery services*  
*Data conversion and georeferencing*  
*Database design and development*
