HALO Smart Sensor

HALO is a key component in the solution to providing a low-risk environment by monitoring Carbon Dioxide (CO₂), Particulate Concentrations, Humidity, Volatile Organic Compounds (VOC), and Nitrogen Dioxide (NO₂) in the air. **HALO** delivers safe, healthy, and comfortable environments that keeps all personnel safe while, at the same time, saving money by efficiently running the HVAC system.

VAPE AND MARIJUANA (THC) DETECTION

The vape epidemic has been skyrocketing among students in recent years. HALO can identify vaping in privacy areas such as bathrooms, locker rooms, dorm rooms, and faculty rooms.

AIR QUALITY MONITORING

With poor air quality, a student's learning environment is compromised, leading to inattentiveness and lost productivity. Automate and ensure proper ventilation in each room with BACnet integration.

GUNSHOT DETECTION

School shootings are happening more often than you think. By placing HALO throughout your school, you can identify gunshots and the location with two-factor authentication. 3rd party certified.

CUSTOM: VANDALISM & TRESPASSING ALERTS

Receive notifications when lights or noise is detected in unauthorized areas and after hours.

AGGRESSION DETECTION

Students and staff can call for help using specific keywords. Get notified of fights or bullying in bathrooms, locker rooms, and dorm rooms.

PREVENT SPREAD OF DISEASE

Some infectious diseases are often spread through the air with high CO₂ levels. Ensure rooms have been cleaned and that air is properly filtered.

CHEMICAL AND GAS DETECTION

Catch chemical spills and hazardous gases in science labs, mechanical or utility rooms, custodial closets, and maintenance areas.

CUSTOM: MANAGE HVAC ENERGY COSTS

Create custom alarms to monitor HVAC effectiveness and only use when rooms are occupied.
